

# Paediatric Dental Nurse Training Programme

NHS England are delighted to be working in collaboration with School of Dental Care Professionals to bring you Paediatric Dental Nursing Training Programme

## Information

This blended, online course aims to provide dental nurses with knowledge and understanding to support the NHS Level 2 programme in primary care. Education will be delivered via MS Teams over 6 half day sessions.

## Course Description

Course content will address the specific role of the dental nurse to support patient care and link to other services such as hospital, community, social services, health visitors, midwifery, and school teams.

## Aims

The aim is to equip participants with the knowledge and skills to effectively support paediatric dental care

## Objectives

The programme will discuss and describe:  
Underpinning knowledge about measuring and recording plaque is covered, together with application of fluoride varnish. These topic areas require a workplace mentor or witness to observe, feedback and sign off a clinical reflective workbook.  
Effective behaviour management techniques appropriate to the needs of the individual

## Learning Outcomes

By the end of the programme, you will be able to apply knowledge and understanding to supporting paediatric dental care and ensuring positive experience for young patients.

Applicants must be GDC registered.

Dental nurses must have access to a digital device (with camera and mic) and have internet connectivity.

Registration with [NHSE elfh Hub \(e-lfh.org.uk\)](https://www.nhse.uk/elfh) is required.

Completion of a workplace mentored reflective Logbook is required to evidence competency.

Independent learning is required between sessions.

Attendance to the programme constitutes **18 hours of verifiable CPD**.
